# Accomplishments (2020-2021)

**Mission Statement-** We will develop an understanding of cultural, ethnic and racial diversity and structural racism, particularly as it pertains to underrepresented populations of patients with eosinophilic gastrointestinal diseases (EGIDS); strive to examine systemic and implicit biases; identify associated barriers to our research; and integrate the knowledge into our research studies and educational initiatives, so that we can better serve all patients with EGIDs.

**Vision Statement** - CEGIR actively promotes a culture of diversity and inclusivity in its membership, in its innovative research studies and its educational initiatives.
